

AG200-003

Dishwasher Air Gap for Thick Counters with Extra Long Threaded Body

Features:

- Available with many different decorative caps
- Accepts standard 5/8" I.D. hose from a dishwasher
- Connects to drain with 7/8" I.D. hose
- Provides extra-long thread for mounting through a thick counter-top
- Designed with strong mounting nuts for simple and reliable installation
- UPC® listed, tested for compliance to IPC® and NSF® standards

General Description:

A dishwasher air gap is a critical component in maintaining a clean dishwasher. It prevents contaminants in the sink from flowing into the dishwasher and is required by plumbing code in most states.

The Amerigap® brand dishwasher air gap provides many advantages over other air gaps available on the market and also ensures safety and peace of mind that your water supply is clean.

A common misconception is that a "high loop" (routing a drain line above a sink's flood level, for instance) will provide the same function as an air gap; this is not true, because the continuous connection between dishwasher and drain line still will allow back-flow of dirty water through siphoning.

This air gap is simple to use and legal to install in any state. The AG200-003 air gap is listed by UPC® and tested for compliance with IPC® and NSF® standards.

Mechanical Specifications:

- Width: 3-1/2 inches
- Height above counter: 2-1/4 inches

Inlet/Outlet Specifications:

- Inlet: 5/8-inch OD
- Outlet: 7/8-inch OD

Accessories (included):

- Top cover nut
- Top gasket
- Bottom retainer nut
- Top retainer nut
- Decorative cap

Material

- Body: Polypropylene
- Decorative cap: Chrome plated ABS

Approvals

- UPC: Listed
- IPC: Tested by independent lab
- NSF: Tested by independent lab
