

# AG200-006

## Dishwasher Air Gap with Skirted Cap and Extra Long Threaded Body for thick or thin countertops

### Features:

- Accepts standard 5/8" I.D. hose from a dishwasher
- Connects to drain with 7/8" I.D. hose
- Provides extra-long thread for mounting through a thick countertop
- Designed with strong mounting nuts for simple and reliable installation
- Standard polished chrome cap designed with skirt cover for gasket and top nut
- UPC® listed, tested for compliance to IPC® and NSF® standards

### General Description:

A dishwasher air gap is a critical component in maintaining a clean dishwasher. It prevents contaminants in the sink from flowing into the dishwasher and is required by plumbing code in most states.

The AMERIGAP brand dishwasher air gap provides many advantages over other air gaps available on the market and also ensures safety and peace of mind that your water supply is clean.

A common misconception is that a "high loop" (routing a drain line above a sink's flood level, for instance) will provide the same function as an air gap; this is not true, because the continuous connection between dishwasher and drain line still will allow back-flow of dirty water through siphoning.

This air gap is simple to use and legal to install in any state. The AG200-006 air gap is listed by UPC® and tested for compliance with IPC® and NSF® standards.

### Mechanical Specifications:

- Length: 3-1/2 inches
- Width: 1-7/8 inches
- Height above counter: 2-1/2 inches
- Total Height: 8-1/2 inches

### Accessories (included):

- Top cover nut
- Top gasket
- Bottom retainer nut
- Top retainer nut
- Decorative cap

### Alternative PN:

- 52, AMERIGAP

### Inlet/Outlet Specifications:

- Inlet: 5/8-inch OD
- Outlet: 7/8-inch OD

### Material

- Body: Polypropylene
- Decorative cap: Chrome plated ABS
- Max. Temperature: 170°F / 76°C

### Approvals, Standards and Certifications

- UPC: Listed
- IPC: Tested by independent lab
- NSF: Tested by independent lab
- ASME: A112.1.3
