

AG250-804

Hands-Free Floor Pedal and Water Faucet Valve for Residential Use

Features:

- Enables precise hands-free control of the water usage.
- Enables hygienic operation that reduces cross-contamination
- Easy to install with few tools
- Operates from a single 9V battery that lasts for two years with typical kitchen usage

General Description:

The AG250-804 Tap-A-Flow hands-free sink pedal is ideal for residential kitchens and bathrooms. Hands-free operation keeps your faucets clean and reduces cross-contamination when touching them. Using the sink pedal significantly reduces water consumption and provides precise control of the water usage.

For parents with young children, older adults with limited mobility and toddlers who cannot reach faucets yet, the stand-alone sink pedal offers convenience, cleanliness, and water conservation. With the sink pedal, there is no more "forgetting to turn the water off" problem. Older adults with hearing difficulties really appreciate that convenience.

The Tap-A-Flow sink pedal is designed to ensure a quick and straightforward installation. The 9 volts battery-powered valve operates the sink pedal for 2 years. To install Tap-A-Flow, drill a few holes, route control cable, and mount the valve in line with hot and cold water. The Tap-A-Flow works with any faucet type. Additional water hoses may be required to complete the installation.

Mechanical Specifications:

- Width: 2.6 inches
- Length: 6.3 inches
- Height: 2-1/4 inches

Water Faucet Valve Specifications:

- Valve Rating: 500,000 operations
- Battery Life: 10,000 ON/OFF cycles
- Pedal Rating: 10,000 operations

Control Cable Length:

- 9 feet

Accessories (included):

- Floor pedal
- Hot/Cold water valve with 9V Alkaline battery
- 1/2-inch Female to 3/8-inch Male adaptor
- Mounting hardware and adhesive pads

Material

- Valve Body: Plastic Polycarbonate
- Valve Control: Silicone Membrane

Warranty

3 years
