

AG250-811

Hands-Free Sink Pedal with Constant Flow Lock, Stainless Steel, Mechanical Cord

Features:

- Precise hands-free control of the water flow with constant flow lock
- Hygienic operation reduces cross-contamination
- Easy to install with few tools
- Controls both hot and cold water
- Smooth and comfortable operation

General Description:

The AG250-811 Tap-A-Flow® hands-free sink pedal is ideal for residential kitchens and bathrooms, medical offices, public washrooms, and commercial kitchens. Hands-free operation keeps your faucets clean and reduces cross contamination when touching them. Using the sink pedal significantly reduces water usage and provides precise control of the water flow.

The AG250-811 is ideal for an active family with day-to-day faucet usage. Once installed in a kitchen, many users do not want to switch back to hand-adjustable faucets. The convenience of hands-free operation makes the sink pedal an essential accessory to any kitchen installation. Pressing on the center of the pedal starts water flow, pressing on the right side of the pedal, locks pedal for continuous water flow.

The Tap-A-Flow sink pedal comes with everything included to assure a quick and straightforward installation. The control cord is simple to route and provides many years of trouble-free operation. To install Tap-A-Flow, drill a few holes, route control cord, and mount the valve in line with hot and cold water.
