

## AG250-812

### Single Action, Hands-Free Sink Pedal for Restrooms, Stainless Steel, Mechanical Cord

#### Features:

- Precise hands-free control of the water flow
- Hygienic operation reduces cross-contamination
- Easy to install with few tools
- Controls both hot and cold water
- Smooth and comfortable operation

#### General Description:

The AG250-812 Tap-A-Flow hands-free sink pedal is ideal for bathrooms, medical offices, and public washrooms. Hands-free operation keeps your faucets clean and reduces cross-contamination when touching them. Using the sink pedal significantly reduces water usage and provides precise control of the water flow.

The AG250-812 is ideal for an active family with day-to-day faucet usage. Once installed in a restroom, many users do not want to switch back to hand adjustable faucets. The convenience of hands-free operation makes the sink pedal an essential accessory to any restroom installation. Pressing on the pedal starts water flow, releasing the pedal stops the water flow.

The Tap-A-Flow sink pedal comes with everything included to assure a quick and straightforward installation. The control cord is simple to route and provides many years of trouble-free operation. To install Tap-A-Flow, drill a few holes, route control cord, and mount the valve in line with hot and cold water.
