

# AG300-004

## Single Economy Air Gap with Brass Decorative Cap with Brushed Nickel Finish

### Features:

- Competitively priced
- Brass decorative cap with Brushed Nickel Finish
- Maximum flow rate at 7.5 gallons per minute (GPM)
- Inlet accepts a standard 5/8-inch I.D. hose from dishwasher.
- Outlet connects to a 7/8-inch I.D. hose that routes discharge water to the side drain on garbage disposal or drain line adapter
- Threaded body enables air gap mounting through a standard countertop with thickness up to 1-1/2 inches.
- UPC® listed product

### General Description:

A dishwasher air gap is critical to maintaining a safe water supply. It prevents contaminants in the sink from flowing into the dishwasher and is required by code in most states. A common misconception is that a “high loop” (routing a drain line above a sink’s flood level, for instance) and a wye connection will provide the same level of protection as an air gap; this is not true because the continuous connection between dishwasher and drain line still will allow back-flow through siphoning.

The AG300-004 is a single dishwasher air gap that is constructed with durable materials, ensuring resilience to everyday wear and tear while maintaining an affordable price point. Its competitive pricing remains unmatched without compromising on performance quality. The AG300-004’s maximum flow rate is 7.5 gallons per minute (GPM). The maximum flow rate through this air gap is the highest flow rate above which the air gap will overflow. The air gap is dry on the outside at the maximum flow rate. The AG300-004 features a stylish brass decorative cap in brushed nickel finish that adds elegance to its design. With a sleek finish, this cap enhances kitchen aesthetic while ensuring reliable performance.

The AG300-004 is easy to install, easy to use, and easy to maintain. The AG300-004 air gap is a UPC® listed product.

### Mechanical Specifications:

- Length (with cap): 8-3/4 inches
- Width: 3-1/4 inches
- Height above counter: 2-3/8 inches

### Accessories (included):

- Brass decorative cap, brushed nickel finish
- Bottom nut
- Mounting nut
- Mounting washer

### Inlet/Outlet Specifications:

- Inlet: Accepts 5/8-in ID hose
- Outlet: Connects to 7/8-in ID hose

### Material

- Body: Polypropylene
- Decorative cap: Brass

### Approvals

- UPC Listed
