

ET113-001

1-1/2 inches X 8 to 5/8-in Branch Water Softener Drain Adapter

Features:

- Connects a water softener's brine discharge tube to a plumbing drainage system in the absence of a garbage disposal
- 5/8-inch barb branch accepts a 5/8-inch ID water softener's drain hose
- Includes accessories to enable direct or slip joint connections
- Made of white polypropylene
- Is compatible with all 1-1/2 inches sink accessories

General Description:

The ET113-001 is a drain line adapter for water softeners that connects a water softener's brine discharge tube to a plumbing drainage system. It is used in installations where sink garbage disposal is not available.

The ET113-001 is 8 inches long with a 1-1/2 inches OD pass-through and a branch that accepts a 5/8-inch ID water softener's drain hose. It is made of durable white polypropylene that will not wear away over time and will not rust or react with water or cleaning chemicals.

The ET113-001 comes with accessories for both direct and slip joint connections.
