

ET113-002

1-½-in X 8 to 7/8-in Branch Water Softener Drain Adapter

Features:

- Connects an air gap to a plumbing drainage system
- Used with the AG200-XXX air gaps when garbage disposal is not installed
- 7/8-inch barb accepts a 7/8-inch ID hose from the AG200 series air gaps
- Includes accessories to enable direct or slip joint connections
- Made of white polypropylene
- Is compatible with all 1-1/2 inches sink accessories

General Description:

The ET113-002 is a dishwasher drain line adapter that connects an air gap's discharge hose to a plumbing drainage system. It is used with the AG200-XXX series air gaps for dishwashers without garbage disposal.

The ET113-002 is 8 inches long with a 1-1/2 inches OD pass-through and a 7/8-inch branch. The 7/8-inch branch accepts a 7/8-inch ID drain hose connected to the AG200-XXX outlet port. It is made of durable white polypropylene that will not wear away over time and will not rust or react with water or cleaning chemicals.

The ET113-002 comes with accessories for both direct and slip joint connections.

Mechanical Specifications:
