

## ET170-023

1-1/2 inches X 8 inches Dishwasher Drain Adapter with 1/2-inch barb branch (Slip joint or direct connection, white)

### Features:

- Connects a dishwasher to a plumbing drainage system in the absence of a garbage disposal
- 1/2-inch barb branch accommodates the drain hose from a dishwasher
- Includes accessories to enable direct or slip joint connections
- Made of white polypropylene
- Is compatible with all 1-1/2 inches sink accessories

### General Description:

The ET170-023 is a dishwasher drain adapter that is designed to connect a dishwasher to a plumbing drainage system. It is used in states where direct connection to the drain pipe with high loop on dishwasher discharge hose is allowed.

The branch of the ET170-023 accommodates the 1/2-inch ID drain hose from a dishwasher and can provide direct connection to the drain line.

The ET170-023 includes parts that enable direct or slip joint connections to the sink. It includes two slip joint nuts, a direct connect nipple, and a true blue premium washer for superior sealing.

The ET170-023 is made of white polypropylene which is resistant to chemical degradation and physical fatigue. It is compatible with all 1-1/2 inches sink accessories.

### Mechanical Specifications:
