

## ET200-004

## Dual Air Gap for a Dishwasher Without Cover and Fitting

### Features:

- Can simultaneously drain dishwasher and RO filter discharge
- Connects to drain with 7/8" I.D. hose
- Connects to dishwasher with 5/8" I.D. hose
- Accommodates a variety of push-in and barb adapter sizes
- Eliminates gurgling or dripping sounds from RO systems

### General Description:

A dishwasher air gap is a critical component in maintaining a safe water supply. It prevents contaminants in the sink from flowing into the dishwasher and is required by code in most states.

The ET200-004 dual air gap provides many advantages over other air gaps available on the market and also ensures safety and peace of mind that your water supply is clean.

A common misconception is that a "high loop" (routing a drain line under the counter, for instance) and a wye connection will provide the same function as an air gap; this is not true, because the continuous connection between dishwasher and drain line still will allow back-flow through siphoning.

This air gap is easy to use and legal to install in any state. The ET200-004 air gap is listed by UPC® and tested for compliance with IPC® and NSF® standards.

### Mechanical Specifications:

- Width: 2-1/2 inches
- Height (with cap): 3 inches

### Inlet/Outlet Specifications:

- Inlet: 5/8-inch OD
- Outlet: 7/8-inch OD

### Accessories (included):

- Inner cap
- Compression Top Nut
- Deck Mount Middle Nut
- Undercounter Bottom Nut
- Deck Gasket
- Inner Cap Custom O-Ring

### Material

- Body: Polypropylene

### Approvals

- UPC: Listed
- IPC: Tested by independent lab
- NSF: Tested by independent lab

### Alternative PN:

- TAG-58BI, DLA-TAG
